From: Jac-Rene' Park

A handwritten signature in black ink, appearing to read "Jac-Rene' Park". The signature is written in a cursive style and is positioned to the right of the printed name.

Subject: STOOL INSTALLATION

The stool kit consists of the following parts:

1. Four pop-up stools, Pizza Time Theatre part number 000-0302-10.
2. Two Pizza Time Theatre ac switch units per part number 000-0170-10 until ECO'd out.

Tools required:

1. Electric drill
2. 1½" wood bit and ¼" drill bit

Installation:

Remove front cover on all four stools, position as shown in installation drawing. With the curved bar, as shown in "A" the stools are arranged evenly around the outside of the bar. With a five sided bar, as shown in "B" arrange two stools on the left and two stools on the right. Stools will be pushed in contact with the front bar and drill the two mounting holes, with the stool in that position, mark the hole for the conduit, "ac power into the stool" and pull the stool back and drill the hole with 1½" wood bit. Mount the stool with 1/4-20 machine bolts, nuts, and washers. Next mount the two ac switchers as per drawing.

At this point, the electrician must be called to wire ac power to ac switchers and from ac switchers to stools. After power is wired up, and hopefully before the electrician leaves,

test units with a 9 volt battery, connect the lead marked 24 volts to the 9 volt battery positive and the LC1 or LC2 to the battery negative. If ac power and wiring is alright, motor should run.

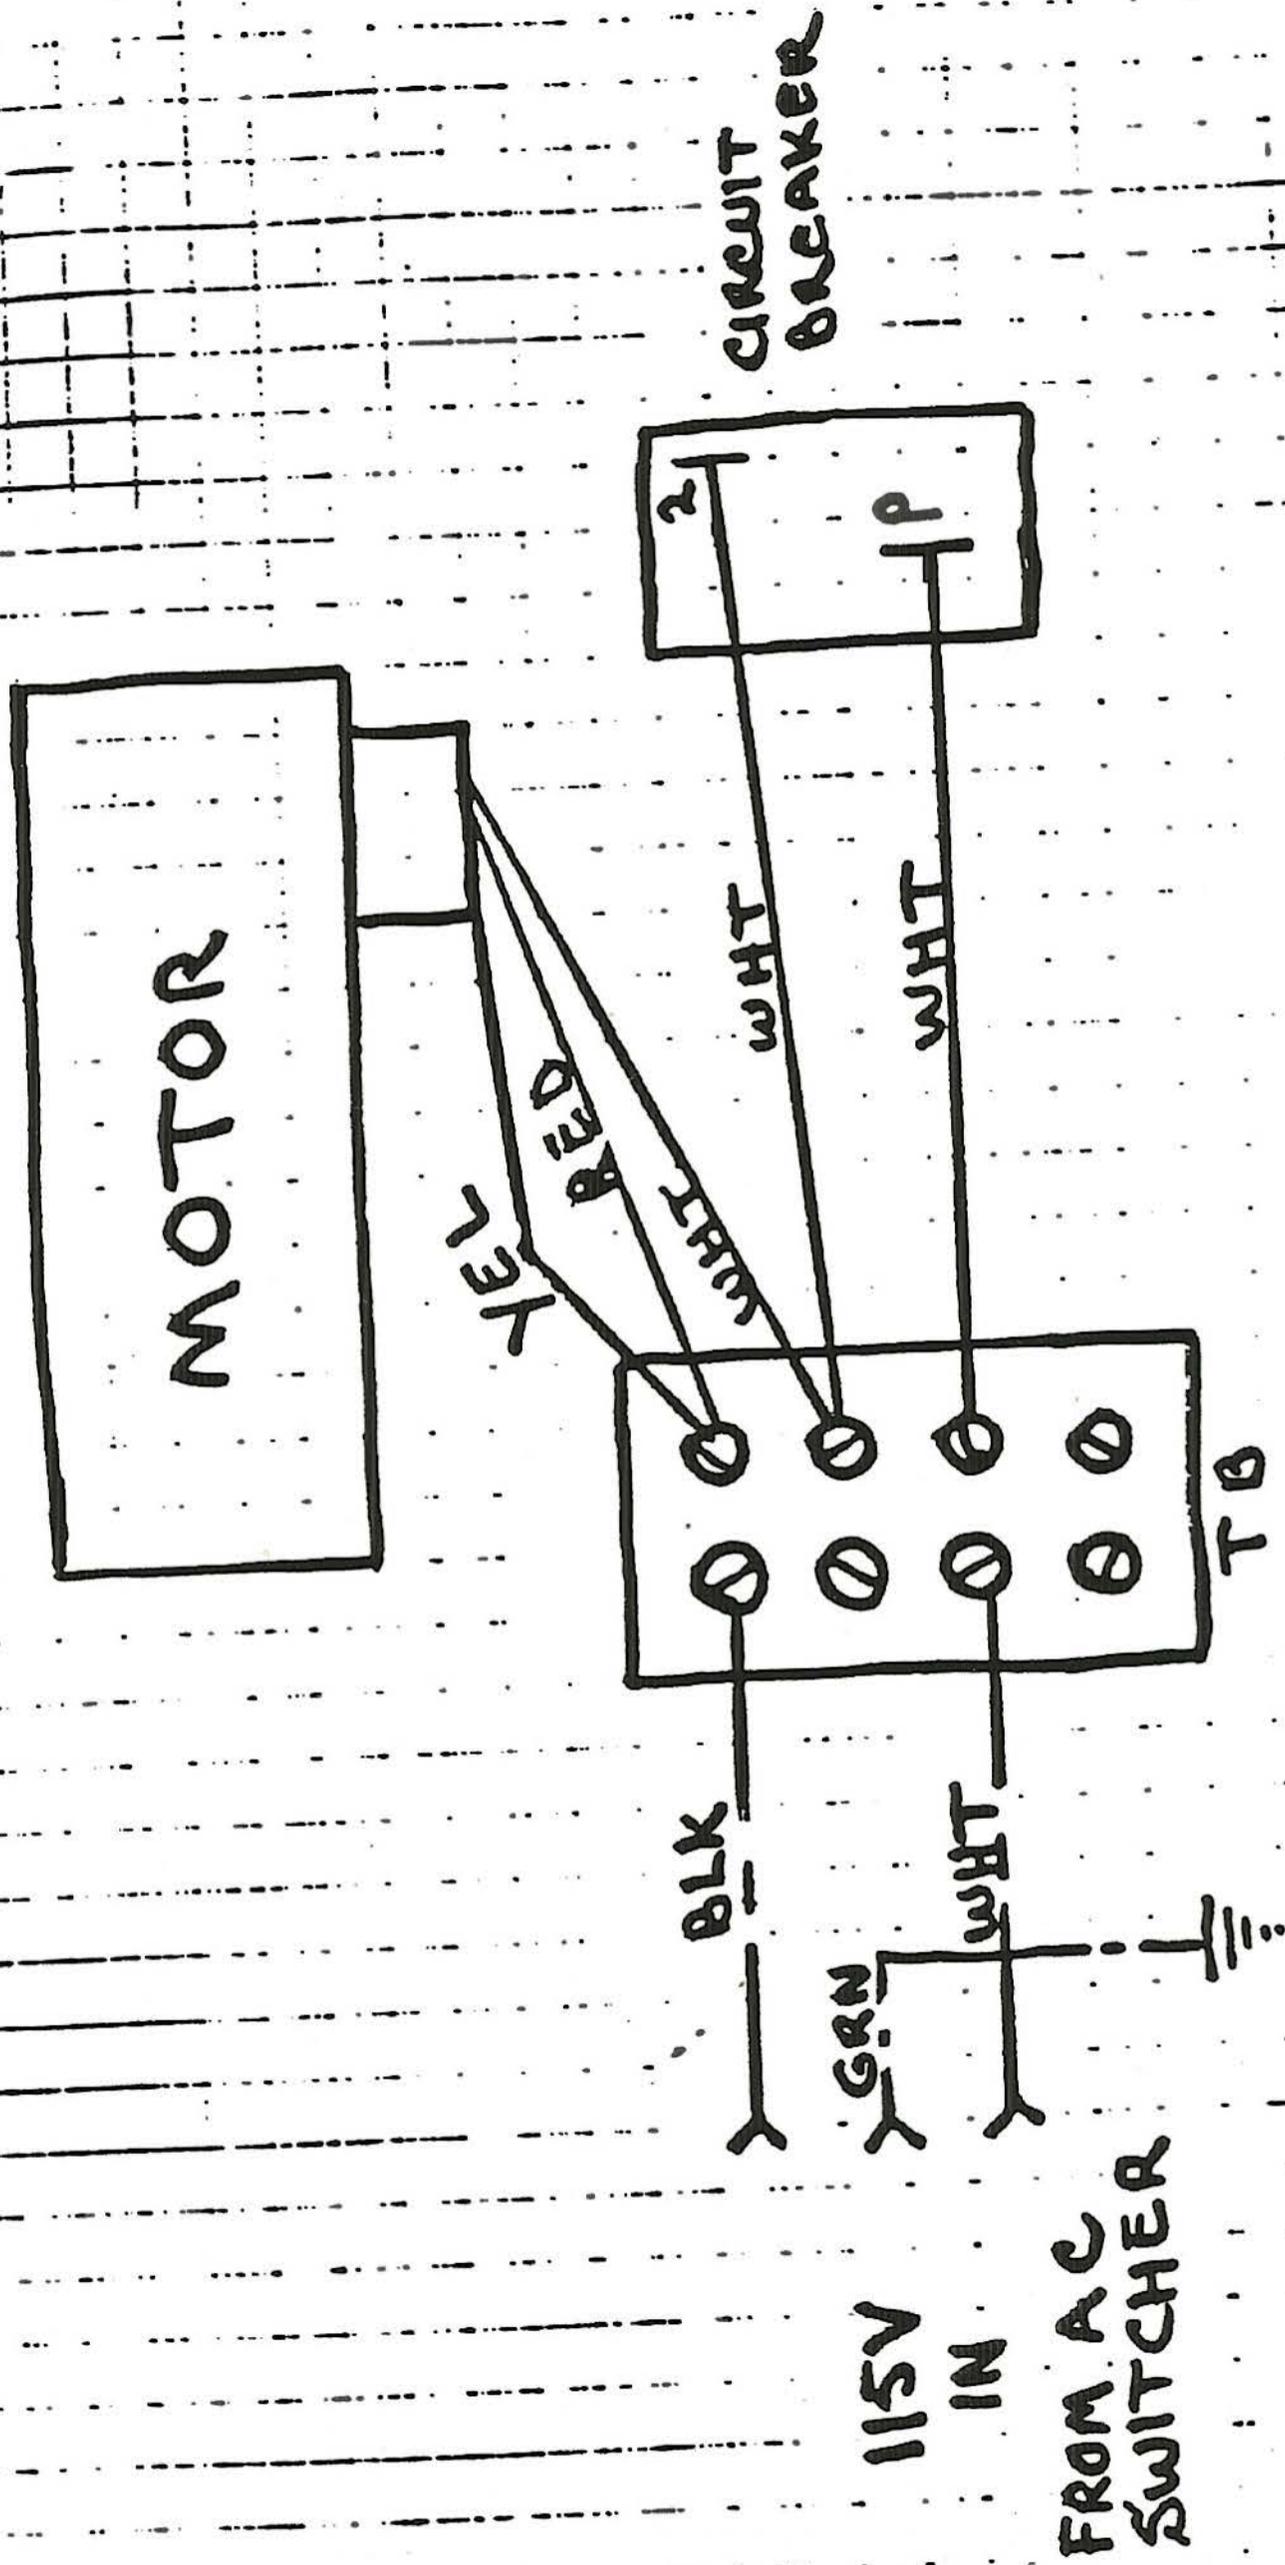

Test all four units, if all units operate alright, proceed to wire stool command of solenoid board. Run skit and check operation, if everything is alright, replace front cover.
